

# CLEAN EXPRESS LIQUID

## SPECIAL DETERGENT FOR COFFEE MACHINES

### FIELDS OF APPLICATION

**CLEAN EXPRESS LIQUID** is a liquid detergent specially formulated for the cleaning of heavy residues on group heads, water lines, valves, filters, filters-holders of espresso coffee machine. It is also suitable for the cleaning of: pots, saucers, cups, etc.

### PROPERTIES

**CLEAN EXPRESS LIQUID** is a brown, odourless and easily water-soluble liquid.

It contains a blend of:

- alkali: for effective removal of fats and proteins left behind by coffee;
- scale control agents: help prevent scaling caused by hard water;
- mix of surfactants: showing dispersing and emulsifying action on dirt.

### INSTRUCTION FOR USE

#### **Cleaning of the parts of coffee machine:**

Put 1-2 spoon (about 10-20 g) of **CLEAN EXPRESS LIQUID** in the blind filter. (depending on amount of soils)

Open the delivery valve, keep it opened for about 10 seconds, than close.

Repeat the operation at intervals of about 20 seconds until the water discharged is perfectly clean.

Using a normal filter rinse with plenty of water

#### **Cleaning of filters, filters holders, cups, saucers, teapots, etc.:**

Dissolve in a stainless steel container 2-4 spoon (about 20-40 g) of **CLEAN EXPRESS LIQUID** (depending on amount of soils) per litre of warm water. Put the objects to clean in the solution, wearing gloves and paying attention to the sprinkling of hot solution, for about 20 minutes until the parts are cleaned. Then rinse with plenty of water.

**CLEAN EXPRESS LIQUID** is corrosive against aluminium; we recommend a checkout on materials. **CLEAN EXPRESS LIQUID** causes severe burns; for more details read MSDS .
